### The florist

FRANZ GRABER OF FRANZ GRABER FLOWER COUTURE

This piece (left) represents the trend of botanical decoration, rather than florals.

My favourite elements are the monochromatic palette, same-tonal values and textures.

As a creative person I source

inspiration from nature and desperation.

I always say "yes" to people who try.

I always say "never" to spoil brats.

I would give this particular arrangement to...

trendsetter Dion Chang, because he is intelligent and has challenging taste.

### The textile designers

LISE BUTLER AND AMANDA HAUPT OF THE DESIGN TEAM

You can see our personalities in this arrangement (below): it reflects Amanda's love of colour as well as Lise's discipline.

We were inspired by doing our bit in the aftermath of a recession, using fabric off-cuts

to create colourful, inexpensive vases.

Musts for home entertaining are simplicity and beauty.

Try dishes, flowers and tableware co-ordinated around a specific theme or colour .. and always a decadent dessert!

We'd love to design a fabric for design hottie Marcel

Wanders: he understands pattern and quirky design.
